

BE A PART OF THE SOLUTION...

UPGRADE YOUR HOME with a
SOLAR HOT WATER SYSTEM

©SolarHot LTD 2009

Take advantage of federal and state tax credits for an investment that:

Increases the value of your home

Pays 30-50% of your installation cost back on your next tax return

Protects you from future fuel shortages and price hikes

Gives you 50-80% lower hot water energy bills each year

Renewable Energy Made Simple.

The Beckett SolarHot™ Advantage:

Easily convert any new or existing water heater into a solar water heating system with the Beckett SolarHot™ package.

- Provide up to 80% of your hot water needs using the renewable energy of the sun
- Combine it with a hydronic heating system for even more energy savings
- Payback in just a few years with available tax credits
- All-in-one heat exchanger, circulators, and electronic control package for efficient operation
- Ease of installation, as the state-of-the-art digital control system mounts directly to the side of a standard hot water tank
- Our highly efficient heat exchange process means the pumps run less, saving you even more money
- Top rated system for overall efficiency by the SRCC
- Standard system will accommodate a family of 4-5 people, easily scalable to your hot water needs
- Freeze-protected to accommodate colder climates

System Includes:

High performance collector panels, a complete pump and control package, and the plumbing hardware necessary to connect to your water tank of choice.

High Quality. Reliable. Simple.
