

Reduce service calls!

Protect your customer's fuel heating system in less than 1 minute per year.
With Beckett, maintaining your customer's fuel heating system has never been easier.

What **IT** does:

- Keeps burner heating oil cleaner
- Keeps heating system components cleaner
- Extends fuel storage time
- Increases oil heating efficiency
- Reduces service calls
- Enhances the profitability of your service department

What **YOU** do:

- The technician simply pours one 8oz. container of Beckett FuelArmor into the customer's fuel tank.
- Only required once a year during the annual service call
- May - July time frame is recommended
- FuelArmor does the rest

Annual Preventive Maintenance

Fuel Gallons	Additive Ounces	FuelArmor Migration
250	8	Full Tank
125	6	Tank Refill
125	4.5	Tank Refill
125	3	Tank Refill
125	1.5	Tank Refill
750	0	Annual Usage

FuelArmor migrates from treatment dose to maintenance dose throughout the year.

FUELArmor

ANNUAL TREATMENT

FuelArmor Chemistry

- **Stabilizers:** Improve stability of heating oil
- **Dispersants:** Reduce sludge buildup
- **Rust inhibitors:** Protect tank from corrosion
- **Anti-oxidants:** Prevent development of sediment

Before treatment

After 1st 500
gallon treatment

After 2nd 500
gallon treatment

Improved Biofuel Performance

- Biofuel is susceptible to solvency issues: **FuelArmor contains no solvents**
- FuelArmor is recommended for all levels of biofuel

FuelArmor **cannot** be overdosed nor does it present any physical hazards to the technician.
